- Application for Library room booking
- Front-end, Back-end
- Flutter, MySQL

2024

Jan - May

Web Application Booking Hotel System

- Web application for hotel room booking
- Front-end, Back-end
- NodeJS Express, MySQL

About Me

I'm a Computer Engineering student at Mae Fah Luang University with a strong interest in web development and AI. I enjoy building real projects and recently created a ChatAI system for MFU using Claude 3.5 from AWS.

I'm eager to keep learning, improve my skills, and grow as a full-stack developer.
